RADIO FREQUENCY IDENTIFICATION

Wednesdays, May 13, 20, and 27
6-9 pm • Fee: \$199

CSULB Center for International Trade and Transportation
1000 Studebaker Road, Long Beach, CA 90815
(Parking is free)

RFID is revolutionizing the way suppliers, manufacturers, distributors, and retailers, track products and inventory by bringing innovative wireless technology and advanced data managing and processing capabilities into their overall operation as part of supply chain management.

This seminar delivers real business value by providing an understanding of the technology and its applications as well as opportunities for operational and processing efficiency improvements. In three evenings, you will gain the knowledge and practical information you will need to be able to start evaluating how RFID should be implemented in your specific business model and how to deal with system and integration issues.

Instructor: Farhad Mafie is President and CEO of Savant Company Inc. He has more than 20 years of experience in the semiconductor and computer industry. His experience includes developing and teaching leading-edge technology and business-related seminars for business professionals on a worldwide basis.
